The Korindo,
First Raelian temple dedicated to the Elohim

This is the most beautiful day of the history of Humanity as for the first time we have a place fully dedicated to the Elohim. The next time we build something important, it will be the Embassy!

Rael, October 7, 65 aH

OCTOBER 7TH IN THE KORINDO

I am so happy to make the transmissions today in front of the Korindo. It is a historical day. For the first time in the history of Humanity, we have a place dedicated to Elohim.

We have had some camping places in the past in France and in Canada that were dedicated to seminars. But this is not a camping place, this is a place dedicated to Elohim, for the first time on Earth.

Don't make any mistake, don't bring your tent to sleep here. It is a place to meditate and say thank you to Elohim, thank you for the Message, thank you for the light in my life.

Korindo in Japanese means 'light coming from the sky' and you can feel here the light coming from the stars. Just like when you read the Message, the light was coming from the sky inside of yourself and now your life is changed and every day you feel the light of Elohim inside you. Do you feel it? If you scream 'yes' loud enough, you will feel it.

Scream for love! Do not do it for me as I don't need it, but you need it. They don't need the Earth, they don't need Humanity, they gave the Message because they love us. We need it, you need it. It changes your life when you say 'Yes', 'Yes to Love', 'Yes to light'.

If your life is put in motion, guided by your love for Elohim, all your life will be fantastic; not only on October 7th or December 13th or when you see me and you touch me, no, every second of your life, when you wake up, when you eat, in everything you do, every second is guided by the love of Elohim. Then your life is different. Keep it inside your heart forever. Every time you breath, 'yes Elohim', 'yes to love', 'yes to light', 'yes to Infinity'.

This is the most beautiful day of the history of Humanity. The next time we build something important, it will be the Embassy!

October 7th
Opening Ceremony

On October 8th
Maitreya celebrated with the
Guides in the Korindo

FOREVER TOGETHER!!

Beautiful evenings too!!!

MAITREYA'S WORDS

THE TEACHING OF ELOHIM IS TO BE HAPPY,

October 24, 65.

You are responsible for deciding to be happy for no reason.

It makes you feel good to be happy because you decide it. That is the power of consciousness, given to us by Elohim. It is the most beautiful teaching in the world.

They don't teach us to suffer, to kill people like the Muslims, or to die like the Christians. They don't teach us to suffer also or to be without pleasure like for the Buddhists. They teach us to be happy, to enjoy everything.

If we want to summarize the teaching of Elohim, it is to be happy, from everything around you, but, above all, for yourself. Like you grow salad and carrot in your garden, you grow happiness inside you. Thank you Elohim for your wonderful teaching. Thank you Elohim.

ABOUT INFINITY,

October 24, 65

I want to talk to you about infinity, but I will not talk infinitely! It is a good exercise to talk about infinity, as short as possible. That's very difficult but it's better than what politicians do; they talk about very little things, for a loooooong time. We need to talk about infinity, for a very short time.

The infinitely small and infinitely large, are one.

The infinitely small is made of atoms, particles inside your body, and the infinitely large of planets, stars, galaxies. In one year, the Earth turns one time around the sun. It seems very very slow for us. We cannot feel it, we just feel the different seasons, but we don't feel the movement around the sun.

But you know that this planet is turning. We don't feel it, but we are moving and this planet it moving, turning. If we were feeling it, we would always be leaning on one side. We don't feel it, as if it was a slow motion.

Inside your hand, there are molecules made of atoms that have electrons, moving, so fast, very fast but we cannot feel them. Like the Message explains, the speed is inversely proportional to the mass.

The biggest are slower and the smallest are faster.

Let's go further.

The sun and the earth are moving, very slowly for us. The sun is moving around the center of the galaxy, even more slowly. We cannot even go one time around the galaxy in our whole life. We also know that the galaxies are moving around the center of this universe, much more slowly.

So slowly, that the most advanced astronomers of the planet cannot feel it.

And then there is an infinite number of universes. And our universe is moving. And we are, according to the Elohim's teachings, inside the body of a huge being. Maybe this huge being is moving, maybe it's playing petanque, we don't know.

But in all the lives of all humanities, the huge being moving is not moving, because it's so slow that maybe we can have 1 billion billion years on Earth and the huge being will do only a small movement.

This huge being is on a planet, and this planet is turning, but more slowly. It is in a galaxy, moving slower, in a universe, moving slower, in the body of a huger being, moving slower.

And it goes like that for infinity.

So we can say that Infinity is not moving at all.

It's moving but it's not moving. Relatively to us, the infinitely large is absolutely not moving. But the being inside the being, which is inside the being, which is inside the being, let's go 10 times, it is moving! Maybe it's playing petanque? And in billion of billions of our years, it might move 1 cm.

Let's go to the other side!

Inside your body, you have electrons and neutrons and inside them, more small particles.

The scientists of the Earth start to understand, moving faster, and faster.

And you know in particle accelerators, like the one at the CERN in Europe, they accelerate particles, to make them go faster and faster and faster in order to discover the smallest ones inside.

They declare something the 'smallest', and later they discover something smaller, and smaller, and smaller. The smaller it is, the faster it moves. When we reach a certain level already, if you take the most advanced electronic microscope they use to try to see the electrons and the particles but they can't see it. You have to make very quick photos because if you look, you don't see them. They are moving so fast, that we cannot see them. If we make very very very very quick photos, then we can see little lines, and 'Ah, this is a particle'.

That's our primitive level.

However we cannot see the smaller particles inside this particle.

And the particle inside the particle inside the particle, are moving so fast, it doesn't fit with the theory of Einstein about the speed of light, because it moves much faster.

And when you go to a smaller smaller smaller smaller smaller smaller smaller smaller smaller smaller part, it goes at infinite speed.

But for the people living on the planet in the infinitely small planet, they move at a normal speed like us.

So speed perception is always relative to where you are on the scale of infinity.

So why is it interesting to understand that ? What does it changes in our lives?

It changes us because we can suddenly realize that we are part of infinity.

That everything huge is not moving, for us, and everything small is moving very fast, so fast we cannot see.

We cannot see the smallest particle not because it's small, but because it's moving too fast.

So we are full of speed, in a universe full of slow motion.

In other words, everything inside us is full of infinite energy, and we are in a world, the universe which is so slow.

And that helps us have harmony and peace inside.

I am full of energy in a slow motion universe.

So I can use this infinite energy for meditation and harmony, happiness, and everything around me, peaceful and slow.

That is why watching the stars makes us so happy.

If it was the opposite, it would be a terrible life, terribly stressing, imagine the opposite!

If everything inside us was slow, and the planet and every star was moving so fast.

Imagine you look at the stars,and the earth is moving so fast...

Everything around us is peace and slow motion, but inside us an infinite energy.

Feel it.

And that makes your meditation beautiful.

That makes your life happier, feeling the infinite speed of energy inside you and peace and harmony and slow motion around you.

And that is one of the secrets of eternal happiness.

THE SYMBOL,

November 14, 65 aH

And it's 11am and we feel the light coming from Elohim, we feel the love coming from Elohim.

Thank you for giving us this symbol, maybe the most beautiful gift you gave us.

Right now, the Elohim are meditating in front of the same symbol.

We don't have the same science as the one they have, we don't have the same wisdom but we have the same symbol. The only moment we are equal to Elohim is when we meditate with the symbol.

When we try to be good scientists, we are much lower, very very primitive. When we try to be wise and have good consciousness we are much lower, but when we meditate with the symbol, we are at the same level as the Elohim.

That's why this is the most beautiful gift they gave us. This symbol makes us equal to the Elohim. Thank you Elohim.

ELOHIM ARE NO GODS

We cannot bow and regard the Elohim as gods, they are not gods they are human beings like us, we must never forget that. Many Raelians make this mistake; they don't believe in god anymore, but Elohim is like a God.

We must not replace god by Elohim.

They are just teachers, human beings, like us. It is very important to remember it.

We cannot suddenly come to Elohim and say "Elohim you are god for me", that's not right.

"We love you, Yes. But you are human beings like us."

Remember the Message; they created us equal to them, not inferior.

So to be Raelian is beautiful, because we respect and love beings who are equal to us.

We are not inferior and praying to a god, we are sending love and respect to human beings like us.

And that gives us huge power, we are equal to the Elohim.

We are the Elohim of the future.

We are slowly becoming Elohim.

We start to create life in laboratories. We start to travel in space. We start to be like the Elohim.

That's why we must never pray to them like almighty gods.

There is no almighty god. The Elohim are human beings like us.

But it's much better than a god.

We give love to other human beings who love us because they are our Creators, our Fathers, our spiritual Guides. Wow, that's beautiful! We don't look at something mysterious and unbelievable that we cannot understand.

We look at Guides. That talks to our intelligence, not to our belief.

That's the wonder of the Messages; it doesn't talk to our stupid belief; They don't say 'believe, believe, don't understand.', they say 'understand everything!' 'You are like us.'

That's different, it empowers you. It helps you become better and better. Because you are the Elohim of the future.

You are the Elohim of the future.

And you can start to be now, right now. Not by praying like praying to a god, no! By praying to infinity!.

And this (symbol) you can replace god by that as it isn't a man, it's a concept.

It's infinite matter and energy.

So I don't want to bow, I don't want to be like that in front of a god because there is no god.

But, in front of infinity, Yes.

Because I am it, this is me, I am this, you are this, so we can really bow in front of this symbol.

Because we respect infinity and we can really love infinity, and be humble in front of infinity.

Everybody do it, please, it's you!

It's not god. It's matter and energy. You can do it.

And this makes you powerful, it's not a god.

You are infinity and by humbly bowing in front of this, in fact, you bow in front of yourself.

And that you should do everyday.

Because when you do that, you do exactly the same thing as the Elohim do. Everyday, they bow in front of infinity.

Because infinity is just a concept, a Universe outside and inside

You are infinity that's why it's beautiful.

Does Infinity have consciousness?

Yes! We are the consciousness of infinity

Without us, without human beings, whether the Elohim or us, infinity has no consciousness

So by bowing in front of this symbol, we bow in front of ourselves, we realize that infinity takes consciousness of itself through us.

By bowing in front of this symbol we become more conscious, and that's why it's important.

This meditation on the symbol is very important.

It helps you be in harmony and happy the whole day long, because there is nothing higher than that, nothing.

Nothing is higher than infinity. Nothing is bigger than infinity.

Nothing can say yes, there is something bigger than infinity, plus one kilometer.

Nothing is bigger than infinity and eternity.

Nothing is longer than infinity.

Nothing can say, ah there is something which is eternal plus 1 hour. That's stupid.

Infinity is infinity. So, nothing is bigger.

That's beautiful, that creates a beautiful day where you feel infinity, you are in harmony with infinity, nothing can destroy this. Because it makes you conscious of the 'right now'.

In the infinity of past, infinity of future, there is a moment which is right now.

What makes the population of this planet sad, is the fact that they don't live in the present.

Either they are in the past which is stupid because the past is full of regret and remorse.

Even if you have a good memory of the past, if you think of these good moments of the past, it makes you sad, because now is not as beautiful.

This is bad. If you think of bad memories of course it's bad also, many people do that, because it brings you back to sadness.

And when you think about the future, it's very bad also.

If you imagine a beautiful future, you are not happy now.

I will be happy in the future when I will have one million dollars, when I will have a beautiful girlfriend, then you are not happy now.

And of course if you are afraid of the future, negative future, "I will become old", "I will become sick", "I will lose my hair", then you are afraid, and you feel bad. This again because you are not living 'now'.

Only 'now', and 'here' of course, is important. Now is more important than here, because now I cannot be somewhere else than here. Some people say happiness is here and now, of course here! You don't need to say here, now. In 10 minutes I can be somewhere else. Now I can only be here.

And that's happiness. Now.

WHAT IS CONSCIOUSNESS IN THIS PROCESS OF INFINITY AND TIME ?

Our consciousness is a machine, a kind of computer, a machine is a better image, which processes the future to make it past.

Our consciousness is like a stomach, that eats the future, and shits the past.

The past is shit, and it's really shit.

We are not the past, and we don't eat the future yet.

What is important? What is in our mouth now? What tastes so good? it is the present time.

But for the future, I don't know if I will have food tomorrow. Africans don't know if they will have food tomorrow. But they are happy now! Because they have one little piece of food, they enjoy it.

Yesterday's food, we don't like it anymore. It smells bad.

But all the cultures of this planet are based on the Past. Are you Japanese? It's the past. You never decided to be Japanese. You never decided to be American or French. This is the past, history, tradition, shit. Our past, our traditions, our borders, our governments are shit. It is the same for the future, we don't know it. To be proud to be Japanese or Korean is the past. From the sky, there is no border. Borders are a creation of man and it's the past.

Schools don't teach the future because they don't know what will happen. But you learn at school all the shit from centuries ago. Napoleon, Gengis Khan, who cares about Gengis Khan and Napoleon?

Happiness is now.

It is the same with the big religions. Jesus is past. You don't know that Jesus is dead? Buddha, Buddha, beautiful teachings, he is dead too. Don't you know it? He maybe alive again, but he died, he's not here anymore.

Every Prophet has disappeared. But there is one here now. People don't want to listen to him though. They read the books of the dead prophets. They are in the past.

'Jesus died on the cross for me!', this is so stupid! It was 2,000 years ago!

So who is here now ? I am! They don't want to listen to me, because I'm here and they are not here now, they are in the past. And remember the past is Shit! That's why the world is in deep shit, because they are in the past.

It goes the same for the future. The government says "We will have a beautiful future, you just have to work hard, pay your taxes, support national effort, the future will be beautiful".

Wait a minute, I want to be happy now. No politician says that.

You never hear any politician saying to you "I want to bring you happiness now". They all say "be proud of the past, and you will be happy in the future". The big religions say the same shit! Jesus is the past. 'We will be so happy in the future because you suffer on the earth, and then you will go to heaven, after.' After? When ? After you die ! So please have a very miserable life, suffer, cry, and once you are dead, you will be happy forever.

But wait a minute, I want to be happy now! Not tomorrow, not after 1 hour, not after 5 minutes!

When do you want to be happy ? Now! So you start to understand, and feel!

MEMBERS OF THE Raelian Structure are Transmitters of the Message and Transformers

Maitreya talked briefly with the Italian Raelians in a structure meeting they had recently.

You, Members of the Structure, are important, you are the consciousness of humanity more than the Raelians. Raelians create connections in the brain of humanity, but you are biologically the neurons of the consciousness of humanity.

You are the ones who spread the Messages of the Elohim on the Earth. But what are the Messages? The Messages are not just a book of words. The Messages are a vibration coming from infinity, they are electromagnetic vibrations coming from the Elohim to their Messenger. I am the Messenger of infinity.

I have brought a Message from infinity, and it's your turn to retransmit it. You are like an antenna, and you have the task of retransmitting these vibrations. These vibrations have the power to transform and we are the transmitters. First, the Message has transformed us and then, through us, it transforms humanity with a metamorphosis. As transmitters, we are on the same wavelength with the Universe and we are responsible for the harmony of the Universe. We transform ourselves by receiving, and we transform by transmitting"

WHY DO WE LOVE ELOHIM?

December 5th, 65

Elohim we love you!,

Why do we love you? not because you are superior gods, you are not. Not because you created us, because you had fun doing it it was pleasure to discover science.

Why do we love you ? Because you treat us as equals, by giving us the Message which talk to our intelligence, a message which talks to our consciousness and not to our beliefs.

That's why we love you, because you treat us as your equal. Thank you Elohim.

Your message is a message of empowerment, not a message of subordination. The essence of your message is not saying "you are inferior and we are your creators", but a message which says 'you are equal to us'.

Many many prophets in history were bringing a message saying "there is a superior god and you, humanity, you are inferior".

For the first time, only the message given by Elohim through me, only this message, coming from a much much more advanced civilization, says 'you are equal to us'.

By reading your message, we understand what we can be, we are as powerful as you.

You don't talk to us as followers, you don't talk to us as believers. You talk to us as creators, equal to you.

You tell us that we are Elohim like you and that is the most beautiful gift of your message. Thank you Elohim.

We call this symbol 'the symbol of infinity' but it's not the symbol of infinity, it's the symbol of oneness.

Oneness with time and oneness with space, that's us. That's you that's me, that's Elohim.

Let's send them our love.

A SYMBOL OF ONENESS

This symbol is not only a symbol of infinity. It is much more than that. It's a symbol of oneness, we are one.

There are many illusions of separation. For example we have the illusion that we are different from the microbes and bacteria. But we are the same, we are made of this.

Scientists recently discovered that there are more external bacterias and little animals living in us than our own cells. There are 10 times more, inside our intestines, inside every part of our body, a huge population.

They are not us, they are other small beings and we believe we are separated from them, but we are one; we need them as without them we cannot live.

They help us digest our food. They help us create energy. That's why antibiotics are so bad, because they destroy everything, and if you take antibiotics then you become very sick after.

We have this illusion of separation just like people who clean everything in their house so much that they destroy every living small bacteria. Then they become weaker and weaker.

We need all these dirty things around us, they are part of us and we are part of them. We are one with the infinitely small.

Scientists study atoms and molecules as if they were something separated from us. But we are made of atoms and molecules.

When you look at clouds, you say " ah it's beautiful, it's water". This water was inside of you before. Then you went to pee, it went in the rivers, in the ocean, and in the clouds.

The clouds of today were your urine of yesterday, or maybe of a few years ago, and it will be back and fall on earth and you will drink it again, in an infinite cycle.

So we are one with the clouds they are part of us, and we are part of them.

We look at the earth as if it were something separated from us. We are made of little dust from the earth.

We are part of the earth and the earth is part of us. We are one

And you and me we have the illusion of separation. We give each other names, Kumiko, Junzo, different people...

This is an Illusion, we are one.

You are me and I am you, and we are the Elohim, and they are us.

That's infinity and oneness.

And yesterday is today, and tomorrow is today. There is also oneness in time.

We have the illusion of past, present, future. It's an illusion and when we realize that, suddenly we want to laugh because it's such an illusion. You are born one day, you die the next day, illusion.

Everything that makes your body has been forever and will be forever. We are eternal.

We take different shapes, we can be a fish, a banana, a human being, a cloud, it's us, we are one.

And when you feel this oneness you feel so much power inside you. No more fear of death, no more fear of aging.

Tomorrow the doctor can tell you that you have a cancer and only 6 months to live. So what? no fear! Suddenly you are part of all, and all is part of you.

That is the power of this symbol.

You may also have the illusion that infinity is separated from us. Infinity is one with us. We are part of it and it's part of us.

You are part of me, I'm a part of you, and that's why you are happy when I speak.

When I speak, do I speak, who is speaking? It isn't me, you are speaking. You don't know how to say it, but you feel it. You don't have the words to say it, to express it, but everything I say, you feel it deeply.

That's why you love it.

You would like to say it for me. You'd like to be the one speaking and saying it.

That's why you love me, not because I am me, you love me because I am you. What you are is expressing itself through my voice.

When I speak, you speak, and then you listen to it and say "wow that's what I feel, that's what I am". Do you feel it?

You feel it when I say "Wow that's beautiful, yes": you speak. It's not me speaking, it's you but you use my voice.

Please use my voice. I am here to speak for you., I am here to speak for infinity, I am here to speak for Elohim.

Because we are one, we are one.

And everything else is illusion and all around us, the whole society, all the governments, all the powers, all the religions, try to separate you. They create illusions of separation: Japan, Korea. It is stupid! When you look at this from the sky, it's one planet. To be proud to be Japanese, Illusions. To be proud to be Korean. Stupid!

The more these powers, governments, religions, economic powers, the more they create separation, an illusion of separation between you, the more power they have on you, to exploit you, to make you work, to make you serve them, to make you make them richer.

This is illusion.

If one morning everybody on this planet while waking up says "wait a minute, we are one". Nobody pays tax anymore. Nobody goes to work anymore. We let the robots work like in the perfect future society. There is no more immigration and visa and borders, we travel suddenly on this planet, governments don't want that.

But the Internet is helping you feel connected, and soon all these stupid governments will disappear, all these stupid armies will disappear, and we will be finally human.

Not Japanese, not French, not Chinese, human beings! That's coming!

How can we help through the feeling of oneness? When you meet someone for first time, what is the stupid question we ask ? 'Where are you from?'! And The answers will be 'I am Korean, I am French (looking up with the nose up), I'm American (chest up, strong), I am Japanese (Aie, bowing).

When people ask me "where are you from?", I say : infinity!

Where is that ? Everywhere!

When did you come from there ? Eternity.

So when people ask you where you are from, just say 'from infinity'.

I have no nationality. I don't want any limit.

Because I am you. Do you feel me inside you? Forever! If I die tomorrow I will still be inside you. Do you feel it ?

Forever!

Because we are one.

And I will feel you forever also on the Elohim's planet. If I die tomorrow, I will wake up on the Elohim's planet, with my Beloved Father, and I will remember everywhere here.

And I will miss petanque.

Because you are part of me forever.

Because we are one.

Thank you Elohim.

JAPAN SEMINAR OCTOBER 65

Happiness is written in our genetic code. However our educators, the media and governments can stop this natural happiness replacing it with fear. Do you still have fear? Fear is the first thing to destroy if you want permanent happiness! All powers are trying to make you afraid as if you are afraid, you need protection. All religions are making you afraid too, even religions that are not supposed to make you afraid... 'You will burn in hell forever nothing burns for ever, nothing can burn forever! Maybe the god of love has so much love that when the body is dead and burned, then it recreates it to burn again...a 'burn' again Christian ;)

They pretend they are protecting you from hell, this fear might have been placed in your head when you were a child. So identify what are your fears as our mission is to destroy fear:

- there is no god and so no hell
- there are no borders, no nations, we are one planet
- black people are not less than white people etc, these are stupidities to give fear ;)

- there is no 'yellow peril'. The truth is that Asian people have never been colonialists, only Europeans have been. Asians are peaceful but America is the worst colonialist in the world saying they fight for freedom with 180 military bases worldwide while China has only 2. The budget of America for military is 1,000 times bigger than China's one. 1,000 atomic bombs in America! And they are using the fear of a 'yellow peril' to keep building more weapons... If there is no fear, there is no need of power anymore.

Laughing is good for your consciousness. The consciousness sends a message to lots of neurons so that they fire together and laugh. Laughing is an orgasm of the consciousness, and it is easier to reach than normal orgasm. The more you have this laughing spark, the more creative you are, it should be a mandatory teaching at school, it would lead to a more intelligent population.

When you laugh, you make the Elohim happy. They made us to be happy. They regret to have created us when they see us fight. Why did they make us ? To see us laugh!

The best gift to them is your happiness. When we laugh they are glad they created us

People can be vegetables or gardeners. You are the gardeners and you can change veggies into gardeners. We want a planet without vegetables anymore

Happiness brings you more connected between you, connected with me, with the Elohim, with infinity, but more importantly with yourself.

Connections are what makes you intelligent. It's better to have a small brain with lots of connections rather than a large brain with no connections.

Let's make an Ikebana in your brain, a flower with lots of connections!

I want to create an ikebana in my head. But is it limited to the brain? The nervous system is the continuation of the brain, all your body is connected to the neurons. All cells are connected to the neurons... We are one!

When you are not connected to other people, you feel lonely, depressed,...It is the same for your cells, they are all important, think about it! You are the guide and teacher of all your cells

Nothing from outside can stress you, only you do it. Whatever happens around you, you can keep your harmony. It's a refined pleasure when a stupid person tells you that you are an idiot

A delegation of Taiwanese among which the leader of a Taoist branch who officially recognized the Elohim as our Creators and Maitreya as their messenger on Oct 7th
