'ASIAN SEMINAR IN CHIBA, NEAR TOKYO

570 PEOPLE WITH OUR BELOVED PROPHET FOR A WEEK OF AWAKENING IN PLEASURE

Perfection = Myth, Happiness = Discipline, Love = Medicine, Our Nation = Infinity... these are 4 strong equations developed by our Beloved Prophet among many throughout this week's seminar in Chiba, a suburb of Tokyo. Raelians were there from Taiwan, Korea, and of course Japan. About 70 of them were among us for the first time, obviously enjoying the challenging teachings of our Beloved Prophet full of humor and love.

PERFECTION IS A MYTH.

On the first day, he targeted what became the theme of this unique seminar: the myth of perfection.

For centuries, the Japanese have been told at school to be perfect and this is completely stupid explained our Beloved Prophet.

'Nothing in the universe is perfect, the Elohim are not perfect, the infinite is not perfect. We have to be the best we can be, aware that we are not perfect. Too many young people commit suicide in Japan because they want to be perfect. The social pressure to be perfect is terrible.'

'Masterpieces made by geniuses are beautiful but not perfect. Van Gogh was not perfect. If you ask a computer to compose music, it could sound perfect, but it won't be beautiful. For a piece of music to be beautiful, it shouldn't be 'counted', 1, 2, 3, 4... This is boring. A music that makes you feel an emotion cannot be perfect and a perfect emotion cannot be an emotion...'

The first step of this week was then for each participant to focus on not being perfect in order to be happy... Mistakes became reasons to celebrate and workshops were organized to challenge the participants to do things where they knew they would not be perfect... We all lived very powerful moments!!!!

'Happiness starts by focusing on being, not being perfect, just being!'

'Life is beautiful if you live like a child. Life is depressing if you only think about being perfect. You will forever make mistakes but never as many as my father, he has 25,000 years advance But what you need to do is to focus on not making a mistake twice. That is the most difficult.'

'If harmony is perfect, it isn't harmony. There is no perfect intelligence, no perfect love...'

'There are good sexual lives, there are no perfect sexual lives, no perfect match, no charming prince or princess... stop looking for perfection, it doesn't exist. Perfection isn't in you and isn't in anyone around you, and this is why we feel one together. Elohim love you with your mistakes. They created you in their image, which means also that the mistakes we make, they have done them...'

'Primitive people look for a perfect god. The old religions say 'pray the perfect god, you are just a worm'. This isn't a good way to start the day looking at yourself like garbage! They created us in their image. We are as perfect as the Elohim. We are as imperfect as the Elohim...'

DISCIPLINE OF HAPPINESS

The decision of being happy must be applied like any other decision, with strict discipline, especially at the beginning when the automatism of depression and sadness are at their strongest. Our Beloved Prophet reminded the participants of important rules to include in that discipline:

- *don't stay stacked in a position that doesn't bring you harmony.*
- *Use your brain to do things you like*
- *Select your environment as the best stimulation for your brain*
- *Eliminate all the excuses ...*

The child night organized by Lara was also a big hit in Chiba. The transformation in the room once participants started to let go was fantastic... Our Beloved Prophet commented on the following morning:

'If you have a child's brain, your brain is more efficient, open to every possibility. If you say "I cannot be a child anymore", you block your brain to so many possibilities. We are alive to play, to enjoy, to have fun. Everything in you has been invented to have fun. Our creators were playing in their lab, never serious. When you are serious, your brain becomes old. You have to keep your Peter pan brain. We can change the world with our smiles, our play and fun.'

'We Raelians are messengers of the Elohim. The first part of the message is happiness... we must transmit happiness. So the best way to spread the messages is to smile, to be happy. Your happiness is the most powerful tool you can give.'

LOVE IS A MEDICINE

Look at others not as they are today but as they can become. If you look as they are today, you start to judge which is the opposite of love. You have to choose between loving and judging. When you love someone, you remove all judgment from your brain and you look at that person asking yourself 'how can I help him or her' You then forget yourself completely, you use your whole brain to help the other. That's love. If everyone on Earth could do that, we would have peace.

Whatever their past, we need to give a chance to people to become better

The #1 cause of depression is selfishness. If you wake up in the morning thinking on how you can have more, it is a good way to be depressed. If you wake up thinking on how you can make someone happier today, then you forget yourself and you won't need to take pills anymore.

Selfishness creates depression, love creates happiness. Love is a medicine.

If you spend the day looking for the person to whom you can give a smile, put your hands on his shoulders without talking about your problems... if you do that, you won't feel depressed. People who give to others are healthier; this was demonstrated in a recent scientific article.

No pill can do that. The best doctor for your brain is love.

We are alive to give love!

One day without saying 'I love you' to someone is a day lost.

OUR NATION IS INFINITY

On the last days, our Beloved Prophet developed the importance to remove borders, especially in our brains.

There can't be any nationalism amongst Raelians, we are the children of the Infinite. Our nation is infinity...

He also pushed a step further what he said on the first Sunday of April to

women.

“Women in Asia need to take charge of their life but also of their society as they have become used to accepting everything for far too long”.

respect women’s rights and try to change

He encouraged them to express their opinion more, to get involved in politics, to become elected, to target all the different aspects of their society that don’t them.

His call to women profoundly shook

them and we should see much

more of them at the forefront of our actions.

Sook KIM from Korea went from trainee guide to guide. Micah, new level 3 is also the leader of the youth cells It will be a special year in Asia for sure!!!

Kahori MURAKAMI was nominated trainee guide in Japan and Yang

The rest of the week in images... enjoy

AUSTRALIAN SEMINAR

The Australian seminar took place a while back but we received these testimonies only recently and thought you would all enjoy reading them... you may even recognize the feelings you experienced too...

SIBEL'S TESTIMONY OF HER FIRST SEMINAR

After learning a new/old friend was a Raelian and going through the "Oh mi God he is in a cult!!!" I became more and more curious. I probably pestered him with too many mundane questions because then he told me about the seminar in Byron Bay that was taking place in a week!. How do I overcome the millions of obstacles! As they say "where there is a Will there is a way". Nursed my sick cat, reassured my only child that he can look after himself who probably was thinking "yeahhh now I can chuck a party!". Apprehensive, nervous and sleepless for 2 nights drove to my friends place and we drove the next 10 plus hours listening to gorgeous music and enjoying the beautiful landscape to Byron Bay.

Every kilometer we traveled more and more of my tension and stress left me. At Byron I met a man (Alcy) with a beautiful

smile who welcomed me straight away, then a fantastic hug from Michael and whatever tension and fear I had melted away by a sweet sweet angel named Bonnie.

I spent a glorious week swimming at the beach, tea tree lakes and the pool, being in the company of amazing, giving, sharing people. I learnt how the brain functions, how negative emotions can affect our life and future behavior and be destructive to myself and others. I learnt the truth and the message and that our creators want us to be happy and live in harmony with our selves and others. Now I feel relaxed, happier, healthier of mind and body. I also learnt I had a fantastic friend who cared about

me enough to share this beautiful knowledge with me. His name means enlightened path and he certainly enlightened me. Thank you Erdahl. Thank you Elohim and thank you Rael and to everyone at the seminar. Now I am free. I love you all!

Sibel :)

JOSH'S TESTIMONY, ALSO HIS FIRST SEMINAR.

"The Annual Raelian Seminar, for a first timer like myself, was one of the best times I've ever had in my life so far. The seminar took place in the lush gardens of the Byron Bay beach resort, where the lecture hall sat next to a beautiful lake and it was the perfect environment to receive the Raelian teachings.

It's difficult to put into words how free I felt in such a supportive environment. I felt like I could be who I really am. Each day I wore whatever I liked without the judgment that comes from society. I met so many beautiful and wonderful people who enriched my seminar experience and I've made many new friends for life.

I've never laughed so much before - the whole week was such a natural high. And my brain was buzzing! I'd learnt so much from the teachings and from little bits of information that I'd learnt from each individual Raelian. Combined, I feel even closer to the Elohim. The seminar was a preview of what eternal life will be like!

I'd like to thank everyone who was involved in enriching my seminar experience - and that means everyone who was at the seminar! Going to the seminar is so vital for recharging the Raelian batteries. I'm even more enthusiastic about spreading the message of the Elohim and the knowledge that I've learnt has helped me to be even happier in my everyday life!

I really look forward to seeing everyone soon!"

love Josh,

Melbourne Raelian

TESTIMONY FROM ERDAHL.

My last seminar was in 1998. My time away is perhaps best summed up as a period of reflection and research. Inspired by Rael. I went back to university to study science and paid particular attention to the subjects taught by Rael. Evidently, virtually all of the neuroscience/genetics concepts that Rael has been teaching for about 35 years is either 1) now becoming realized by the scientific community (e.g. pain/pleasure architecture of the brain, benefits of meditation); 2) is consistent with current science doctrine; 3) or areas of emerging research and increased interest (e.g. redefining the structure of the cosmos).

Also, over this period it became evident to me that "you can take a man out of Raelian Movement but you can not take a Raelian out of the man." Ultimately, I think it comes down to the fundamentals of the Raelian philosophy 1) it feels "right" and 2) it is well reasoned and robust (i.e. intelligent).

So when I turned up to the 2008 seminar I was so pleased to see my fellow Raelian friends. I saw how much my old Raelian brothers and sisters had grown in consciousness and had developed their talents. On top of this, I was blown away by the collective intelligence and talent that is now in the Australian Raelian team. The messages are truly liberating and it then follows that the people in the movement are liberators!

Thank you to my Raelian brother Jeffrey for keeping me up to date with all developments whilst I was on leave.

SCOTT MACKAY'S TESTIMONY

I attended my first Raelian Seminar in January, and the love and warmth I felt from everyone at the event was like nothing I have experienced before. Being with people of a higher consciousness and awareness for 7 days was a very special moment in my life, I felt I was with a long lost family. We viewed a lot of information that has been discovered by scientific research about how our minds and bodies really work together to create our current personal realities. After reading the Messages and attending the seminar where I listened to Rael speak. I choose to believe that Rael is the final prophet and the Elohim truly are our creator's. I'm here to help our prophet in anyway I can to spread the Messages and save humanity.

In closing I would like to thank all involved with the Seminar for making it such an enlightening experience.

Kind Regards , Scott Mackay , Australian raelian

THE EUROPEAN GUIDES AT A SEMINAR IN SESTRIERE, ITALY.

The European guides met during a four-day seminar in Sestriere, Italy from May 1st to May 4th. This was a great opportunity to

exchange on the foundations of our philosophy, on the keys from the Message and on our actions in Europe... It is during moments like those that one realizes the amazing wealth of Our Fathers' Messages, they offer us meditation, prayer, truth, values like the one of being responsible, of having absolute respect for life and sharing, they ask us to always judge our actions in comparison with the infinite, the Elohim, society and the individual, they tell us that femininity is essential for the future of humanity, without forgetting atheism, the spiritualization of science, happiness and the joy of BEING... This was a true bath of love and religiosity with Our Beloved Prophet always on our minds, He is always there to make us grow further.

At the end of the seminar, Claude said: "There is really true love between us, real love without counting or judgement, conscious of our role to spread the Messages, let our philosophy spread around the planet and let us welcome our Fathers from the sky. We will be ready in time!"

In joyful anticipation of the summer seminar in Lendava, Slovenia. We are waiting for you all ...

NEWS AND VIEWS

UK HFE ACT

The UK Raelian Movement expressed its support to the government for the recent votes regarding the amendment of the Human Fertilisation and Embryology Act. Some Catholic media wrote that the UK government was adopting long standing Raelian philosophies which is quite true (we have to note it when Catholic media says something right about us;-) In short, the UK recently granted access to IVF treatment for Lesbian couples and single parents by removing the "need for a father" for children conceived through IVF; they decided to keep the upper time limit of 24 weeks for abortion instead of cutting it shorter as some conservative MPs were asking; the attempt to block all hybrid embryos launched by a former Conservative minister was unsuccessful ... and the UK Raelians are delighted.

CLUSTER BOMBS

More than 100 nations are taking part in a Dublin summit where Diplomats are gathered to secure a treaty banning the use of cluster bombs. Today the UK government showed its commitment saying that it will end the use of cluster bombs by its armed forces, and that it wanted a planned international convention outlawing the munitions to be as strong as possible.

Cluster munitions open in mid-air and scatter as many as several hundred "bomblets" over a wide area. They often fail to explode, creating virtual mine fields that can kill or injure anyone who finds them later -- often curious children. The prime minister has decided that these weapons of concern in the UK army would be withdrawn from service.

Unfortunately, the United States, China and Russia -- three leading military powers -- are not represented at the meeting and don't show any intent to change their weapon stocks.

Rael made the following comment:

"Of course cluster bombs should be forbidden as well as a lot of other weapons like land mines, depleted uranium ammunition, nuclear weapons, and all existing weapons which should all be replaced by non lethal weapons, which do exist right now and could easily equip all peace keeping armies. If countries like the US want to keep deadly weapons it's because they want to continue to dominate the world in an imperialist style. But soon the biggest countries of the world, China and India, will end this domination, and if they also equip themselves with the same deadly weapons, (and they are doing it!), they may well one day use it against the US (as well as torture and Guantanamo style camps) then the US may well regret one day not to have acted to make all these terrible things illegal.

ILLEGAL POPPIES

A Japanese city just destroyed thousands of flowers grown for a local festival after a police officer noticed they were illegal opium poppies. About 2.5 acres of these beautiful flowers were burned. A police officer had noticed that they were a banned type which can be used to make opium.

These flowers were part of an annual flower festival frequented by several thousand people every year, and were grown by volunteers purely for aesthetic reasons.

Rael who was in Japan when learning of this, said:

“Forbidden beauty?! Is there anything more stupid than the banning of a flower? To forbid making drugs from the plant - that’s possible, but the interdiction of growing a beautiful flower for the beauty and pleasure of having it in your garden is so stupid. Poppies are among the most beautiful of flowers and, as long as they are grown to give beauty to gardens, they should not be forbidden in any country.”

A GREAT VICTORY AGAINST CENSORSHIP BY A GROUP OF RAE LIANS

A group of Raelians - including some exiled in the US – who had created the website miege.net in order to express their non-mainstream views have just won in court against the municipality of Miego which was trying to close the site down.

The municipality of Miego, which apparently did not appreciate its many Raelian residents and the Raelian meetings on its territory, had tried to forcefully acquire ownership of the domain name miege.net through a complaint filed at the OMPI (world organization of intellectual property, based in Geneva). In its decision issued on May 23, the OMPI does not recognize to the municipality of Miego a right on the name of the website, famous for its irreverence since its creation in 2002.

The small village of Miego had therefore spent thousands of Francs of taxpayers’ money on legal and lawyer fees, with the sole objective of censoring a website which content, close to the Raelian ideas, upsets the mostly Catholic municipal authorities.

Indeed, the text of the complaint filed last March mentioned that it was the fact that the site owners were Raelians which motivated the authorities. We can safely bet that if the website had a Catholic content and was defending pedophile Catholic priests instead of denouncing them, it would not have been considered a dangerous unofficial competitor to the municipality’s official website.

The Swiss Raelian Movement joins the winning Raelians in this case in celebrating their joy to see their freedom of speech vindicated. We wish full success and a long life to this conservative-upsetting site.

KOREAN RAE LIANS IN FAVOR OF ABOLITION OF LAW BANNING ADULTERY.

Korean Raelians strongly approve actress Ok So-ri for her decision to petition the Constitutional Court in order to ban the law that makes adultery illegal.

‘It isn’t acceptable in our modern age to face a 2 year sentence because one partner of a couple is involved in adultery’ says Jina xxx, spokesperson of the Korean Raelian Movement. ‘Adults should be free to enjoy their sexual life the way they wish, as long as it is between consenting adults, this is the only restriction that we should have in our law.’

QUEBEC RAE LIANS ASK THE LIBERAL PARTY TO RESPECT THE RECOMMENDATIONS CONCERNING THE CRUCIFIX IN THE NATIONAL ASSEMBLY

Montreal, May 23rd, 2008 – According to the Bouchard-Taylor commission, in order for the state to be able to claim being secular and promoting religious neutrality and the separation of church and state, the walls of the National Assembly should no longer display crucifixes. The members of the Quebec Raelian Movement totally support this recommendation and ask the 3 political parties represented at the National Assembly to respect it even if they voted against it last Thursday.

‘We absolutely agree with the commission’s recommendation. The Quebec state can not claim to be secular on the one hand, and promote one particular religion on the other hand by displaying its symbol within the National Assembly, which is supposed to represent all citizens’, noted Marc Rivard, presiding bishop of the Canadian Raelian Movement.

Prime minister Charest had submitted a motion to the National Assembly on Thursday: ‘‘May the National Assembly reiterate its will to promote the language, history, culture and values of the Quebec nation, help everyone integrate into our nation in a spirit of openness and reciprocity, and testify on its attachment to our religious and historic heritage represented by the crucifix in our Blue Office and the coats of arms adorning our institutions.’’

Although it has been adapted unanimously, it is far from being acceptable to all citizens. In the name of History, the government of Quebec has committed to perpetuate a so-called tradition (which in reality started in 1936) which is highly discriminatory toward an important part of the Quebec population.

NO TO ABORTION BEING A CRIME ONCE AGAIN, YES TO THE RIGHT TO BE A PARENT *By Orev, assistant-guide Canada*

Our Beloved Prophet recently declared in a press release (April-May 2008) that ‘Switzerland deserved the Guinness record for stupidity regarding the new Swiss policy aiming at preserving the dignity of plants’. Incredible but true, the Swiss Federal ethics committee in charge of non human matters laid out a set of criteria to help agencies who give grants for research determine which kind of research may « offend the dignity of plants ». Our Beloved Prophet added « Moreover, isn’t this policy in complete disrespect to the dignity of the people who see their politicians make such stupid decisions? If that is the case, these « ethical committees » should immediately be dissolved ! » Brigitte Boisselier, added : « Raelians around the world should make it their mission to denounce all these pseudo ethical decisions that are no more than the last attempt of conservative, deistic and orthodox dogmatic people trying to keep humanity stuck in ignorance and obscurantism. They manage this thanks to a time tested method : keeping people in fear, in this case, fear of science and new technologies.

Well, I have something to denounce ! Here in Canada, we are once again facing a concern that is not related to ethics but to politics,. Indeed, Mr. Harper’s conservative government submitted a law proposal entitled C-484. It is designed to protect all unborn children from being the victims of a possible criminal act. This law was passed by the House of Commons last March with a 147 to 132 vote margin during a session where many liberal deputies were absent.

This law proposal is meant to modify the penal code so that it would become a crime to cause injury or death to an unborn child, in other words, a fetus. The defenders of this proposal declare that they only wish to better protect pregnant women from violence. However, what is at stake here is recognizing that the fetus has legal rights . So far, the definition of a human being is as follows: « a child only becomes a human being once it has completely come out of his mother’s womb alive. The ratification of

law C-484 would insidiously cause the modification of this definition and would give the fetus a legal status and would thereby make abortion a crime once again. However, in all previous cases, where the Canadian Supreme Court had to render a verdict whether a fetus had legal rights or not, the Court always stated that 'the fetus cannot be dissociated from its mother and has no legal status on its own'. To grant legal rights to a fetus is in complete opposition with the right of women to dispose of their body as they wish, including the right to go on with their pregnancy or interrupt it. It goes without saying that anti-abortion groups are pleased with this law proposal; they see it as a first step to make abortion illegal once again. None of this is very reassuring.

Here are my thoughts about this: What is taking place in the head of our politicians? To submit a law proposal against abortion under a disguise! It is the height of paroxysm ! If this debate were to take place between people who truly care about social progress, shouldn't a more fundamental question be asked, like establishing a permit or a right to be a parent. Have you ever been in the presence of a shaking new born baby, in a state of withdrawal from the drugs or alcohol that his mother consumed (Alcohol Fetus Syndrome) ? Have you ever seen a blind baby or a heavily handicapped child who endured the carelessness of his parents (checking baby) ? Have you ever witnessed a neglected child , abandoned, alone, without care ? If there is one question that we should ask ourselves, it should certainly be this one: How is it possible that in our so called « civilized » society, we pass laws to honor the dignity of plants and animals... while we are still there with the dignity of human beings ? What about defenseless human babies ?

In our days, we require a license to do most of everything, to drive, to be hired (training, diplomas). And yet, to give life to a human being, no licence showing one's competence is even required. What fears may lay behind this? As Dan Freeman (Daniel Chabot) says on page 90 of his book, *The Brain of Good and Evil* published by Québecor , ' it is as if we were afraid of being perceived as Nazis 'eugenis'ts' or I don't know what else as soon as we state that non responsible people should not give birth to children that they will not treat as a human being should be treated. However, if we look at this problem and its cause with lucidity, we will have to come to the conclusion that those who decide to give birth should demonstrate their ability to raise them (...) Psychological tests would have to be implemented to make sure that people who want to have children have the required mental balance to insure they can give the basic, emotional, intellectual care to the child they wish to bring to the world. »

Today, a parent who wishes to adopt a child (National or International adoption), is submitted to a strict evaluation process. A complete and relatively reliable psychological evaluation allows the selection of the parents that are most fit to care for and raise a child. If such an evaluation process is valid for certain children who are given the opportunity not to live with their biological family then should it be less ethical to apply this process to parents who wish to give birth ? Most parents are psychologically balanced and have nothing to worry about from this process. On the other hand, the parents whose biological, social and affective inheritance are irreversibly damaged and do not have the minimum capabilities to be parent could feel satisfaction in other ways if we helped them with it. But the greatest gift that these parents bequeath humanity is the one of not giving birth to a suffering child or one who may potentially suffer even if they are not the ones personally bestowing this gift because of their lack of consciousness and society had to make the decision for them. It will take time to reach this level of personal consciousness but education will be a key factor in this. It is always important to remember that children are brought into this world for their own sake, for the sake of granting them a healthy, balanced, fulfilling life, filled with happiness and never for the individual, selfish, healing need of a parent.

Our philosophy, and our spiritual leader, Our Beloved Prophet, allow us to have a perception ahead of its time for everything happening in our society. It is our duty to remain vigilant and take a stand.

[In Montreal], we will participate in a demonstration alongside other organizations who are protesting against this outdated law, thought by old-fashioned minds. We will be there with our little pink hats, displaying our values 'femininity, the future of humanity'. One more step toward... the extraordinary.

Professionally, Orev works as a social worker, she knows what she is talking about;-). She led the Raelian group who protested in the streets of Montreal with other organizations a few days ago. Unfortunately, her deep desire to stand up for the respect of children had to quickly change into a struggle for the respect of Raelians as the organizers of the demonstration became physically aggressive against the Raelians who had come to protest, causing facial injury to one of them. Of course, that is not going to stop them... more on the struggle against ordinary racism led by extraordinary beings in our next publication !

RAELIAN PLANET - IXATCHILAN

A NEW NATIONAL GUIDE IN MEXICO !

A few days ago, the national guide of Mexico, Esteban Hernandez, asked me to accept his resignation and I accepted it after the approval of our Beloved Prophet. Esteban is therefore not a member of the structure anymore but is still a Raelian. In regard to this resignation, our Beloved Prophet reminds us the importance for the National Guides to communicate their actions of diffusion with the rest of the planet with the help of the Contact and to participate fully in the planetary diffusion actions. Communication and discipline are two of the main challenges that the continent of Ixachitlan must overcome in order to improve the diffusion of the fantastic Message that the Elohim entrusted us through their Beloved Son.

I would like to announce, at the same time, the nomination of a new National guide for Mexico! Let's welcome Maria Del Carmen Hernandez Enriquez, everyone calls her by her nickname, Maricarmen. She is a sensitive, strong woman, determined and disciplined and whom I had the chance to meet several times during my travel to Mexico and I am convinced that she will quickly become a model not only for Mexico, but for all of us. Congratulations, dear Maricarmen and may the Light of the Elohim guide you in your new mandate...

Daniel Turcotte, Continental Guide

COLOMBIA

Here is a letter that Alan Rojas, National Guide for Colombia, Alan Rojas, sent to the constitutional Court of his country. As you will see, Alan, takes every opportunity to question well established traditions.

Sirs,

Honorable magistrates of the constitutional Court of Colombia, Bogota D.C.

Motion to render the motto found on the Colombian police badge « God and Country » unconstitutional.

The following letter aims at requesting that the motto written on the badge of the Colombian National police be rendered unconstitutional. We consider that this badge is in complete contradiction with articles 19 and 20 of the Colombian Constitution which refer to freedom of worship. This demand is made on behalf of the Colombian Raelian Movement and is presented by the undersigned Alan Rojas, Director.

We demand that the motto appearing on the National Police badge be replaced by 'Fraternity and Equality'

Our request is based on the fact that the concept of god is a dogma rooted in one's personal faith and not in any argument of a scientific nature.

Furthermore, we deem important to emphasize that the motto 'god and country' violates the constitutional right of atheist citizens and sends a confusing message when it comes to the separation of church and state.

The National Police as a public entity, must not display such motto on its badge as it leads to prejudice against those who do not believe in God and disrespect of Atheists' right which Raelians had to endure several times in the past. May we remind you that Colombia is a secular state and that in order to insure the proper running of governmental institutions; our nation cannot stand for one belief at the expense of another. To act against these fundamental principals is a true insult to citizens who do

believe in god.

In the hope that the Honorable Constitutional Court, keeper of the law of laws will be favorable to this motion.

ALAN ROJAS, Raelian Director of Colombia

RAELIAN PLANET – NORTH AMERICA

MIAMI RAE LIANS INFILTRATE GAY PRIDE FAIR IN FORT LAUDERDALE FLORIDA.

Sunday April 13th

You can see in these pictures the fun this great team of Raelians had at this festival in Fort Lauderdale which is home to a diverse group of sexual minorities. Raelians are always ready to share the love and appreciation for life where there's a gathering. The gang met around 1 pm to share a glorious spring Florida afternoon. From Miami we had Donna, Irene, Jesus, Raquel and Mayen and Luis from Delray Beach representing ARAMIS. After having a great time overcoming the challenge of printing leaflets on color paper, we were told that it was not allowed to pass out our information. We didn't get discouraged, Jesus and his positive ways emphasized on the fact that the flyers had no date and that we could always use them, and mama Donna decided to take a few in her secret compartment to pass out for the curious that looked at us wearing antennas... hehe

("Always look at the bright side of life"). We all followed the example and initiative of Donna and managed to pass out several hundred flyers.

We were part of activities in the fair such as a great cooking show with very high ends waterless cook wear that taught us to cook in a way that is congruent with our teachings, keeping 99% of vitamins, maybe Donna and Jesus will have us over for a good healthy meal when they get their new pots!!! Yeah! We played with the crowd and passed out our flyers and everyone had such fun laughing. Then we looked at the GIGANTIC AIDS KILT in memory of people that have passed because of AIDS. There were all types of people, gay, bi, straight, children and lots of skin, which was the best part, how comfortable this part of the community feels with their bodies and the artistic expressions that they all are in the world. Raquel's idea of wearing antennas got so many strangers to smile at us just because we dared to be different and because we were ready to smile at them first as the beloved prophet has suggested to us many times. We were real love to our brothers and sisters of sexual minorities. We passed the messages of our creators and we will keep it up being a part of every major sexual minority event in South Florida in this Raelian year 62.

FLORIDA RAE LIANS JOIN THE FIGHT TO CURE AIDS

Hello brothers and sisters. I have the latest news on our diffusion for ARAMIS in the Fort Lauderdale Florida region. Sunday April 26th Fort Lauderdale held the AIDS WALK , a six mile walk that extends from the Broward Museum of Art on Las Olas east towards A1A (The Ocean) and back around with the participation of over 2,000 people. The Florida Raelian Group arrived a bit after 9:30 am and began mingling, smiling and loving the crowds while passing out Intelligent Design and ARAMIS leaflets. I started taking pictures of the beautiful and artistic people and their expressions such as home made t shirts, hats and doggy outfits which were everywhere to show support for AIDS vaccine research and treatment. Among the best t shirts slogans were "If only it was as easy to TELL", "I have HIV", "We all look the same for HIV". The groups were original and had items in their booth to collect donations in exchange to help the cause. The common denominator among the teams was love; you could feel it in the air. The Fort Lauderdale Gay Chorus entertained the crowd in a breeze spring morning and speakers were present to show appreciation from congressman, mayor and even 2 TV stars from Sex and the City, who received the Keys of the City of Fort Lauderdale for their hard work and compassion in everything related to raising awareness of the AIDS epidemic all over the US.

We started the walk at 10:00 am sharp and armed with smiles, flyers and water bottles started to pass out our love dust with the messages. People were loving, open to our gift and welcoming. Teams of people were helping out in many ways such as every so many blocks there were a couple of volunteers cheering on participants, others passing out water, showing people to portable restrooms, chanting for people to get checked for the HIV virus, others holding plastic bags to recycle all the plastic water bottles that had been distributed.

What an amazing way to come together Floridians. We ended up energized and with a profound love for mankind. The openness of the community serves as an example of what's possible when love and generosity play a primary role in our lives. Spreading the message of the Elohim gets everyone closer and open to give and receive. Thank you again our Beloved Prophet as the opportunities to spread love is endless. Our words can never express the love we have in our hearts for you.

RAELIAN PLANET – MIDDLE EAST

FESTIVAL BUMBELA -

By Joce Blottiere

We were a dozen Raelians, gathered together to experience an extraordinary weekend of pleasure

The Bumbela festival welcomes between 30 to 35 thousand people each year and this year we decided to be part of it. It takes place at a beach almost in the desert and if we want to participate we have to accept to sleep under the stars. A beautiful experience for me who had never gone camping before What a surprise to have realized that the average age of the participants were between 14 and 30 years old. YEAHHH !!

We had a blast while dancing to the rhythms

of Techno and South American music. We had a great time while passing our pamphlets and furthermore the pleasure to be together made this weekend a charm.

Memorable meeting :-)

IN PALESTINE

On May 10th, we had the great pleasure to meet for the first time our brother “Sky” (nick name for security reasons) living in the Palestinian territories. We where 11 isRaeli who all came to a neutral place close to the village where Sky lives to meet him and share lunch together. We really enjoyed every minute of it :-)

It was the first time Sky was meeting with Raelians since he heard about us after the birth of Eve the first clone baby announcement. We will never thank you enough dear Brigitte. It would never have been possible for us to spread the message in the whole planet at the same speed and find these diamonds in places we are not even able to go :-)

It was a great feeling of joy and sadness to see our brother living almost in a concentration camp. Not being allowed to enter the isRaeli territories freely, any isRaeli public buses, or even to enter any isRaeli restaurants or hotels :- (It reminds me the time black Americans where not allowed to enter the white busses and public places, or Jews in Germany during the Nazi regime. How the Holocaust survivors can be so cruel toward other Humans with all they have suffered Have they already forgotten? On one side they ‘masturbate’ our brains publicizing the Holocaust horrors by movies, books, articles, etc, since more than 60 years and on the other they impose the same regime to the Palestinians :- (

It was also dangerous for Sky as well to be seen with us. If Palestinian people know he met with isRaelis, they would assume he is a traitor or a spy and his life could seriously be in danger.

Because of his Palestinian citizenship, Sky was not even able to get his visa to attend our mini seminar in Turkey.

Today, I had the feeling we really started the peace process between Palestinians and isRaeli and nothing will stop it ;-) Let’s never forget that it is thanks to the Elohim’s message that we have all met :-)

Thanks to the Mashiach (Messiah) Rael who brings us the religion that unifies all Humans. All nations, all people, without any difference of race, sex or religion.

Love

Leon

RAELIAN PLANET - EUROPE

FIRST SUNDAY OF APRIL IN FINLAND

I traveled to Tampere with my friend and brother Pekka, who had worked hard to prepare this event. More than 30 people came to the lecture we gave in a room of the art school of Tampere, third biggest town in Finland with more than 200,000 people.

The attendees were mostly university students between the ages of 20 and 30, they were very respectful and eager for knowledge. There was also an art teacher from the school who promised to help me in future diffusions... the room was full. According to some participants, the energy was excellent. During the lecture I was able to lead them through the meditation on void- very interesting. We sold 3 books and I gave one to a young journalist in charge of ULTRA, a very well-known newspaper in Finland which talks about any kind of subjects that stands out of the ordinary. I showed the DVD where Marcus explains about science and the origin of life.

At the end of the lecture, the journalist came to speak to Pekka and I, and asked if we would be interested in doing the same presentation at the party organized by the newspaper and a local group called UFO- Rock, to replace a woman that couldn't come. A one hour lecture- the opportunity to sell our books, show slides about our philosophy, and introduce the seminar...

There is no coincidence, especially when Pekka tells me that people in the area are more receptive, because they are less solicited than in Helsinki (Finland's capital) for example; and this city which is the third biggest city in Finland population wise is a wonderful spot to spread the message... There will be two other speakers known by everybody in Finland, a philosopher and a specialist in Tantra.. It's a one time opportunity to step into this kind of conference and to invite back all the young people we met at the first lecture and at the same time quickly inform the new people present that day. On the top of all this, going back to Helsinki, I sold a book to a person who left his name and address on our website.

Love you all.

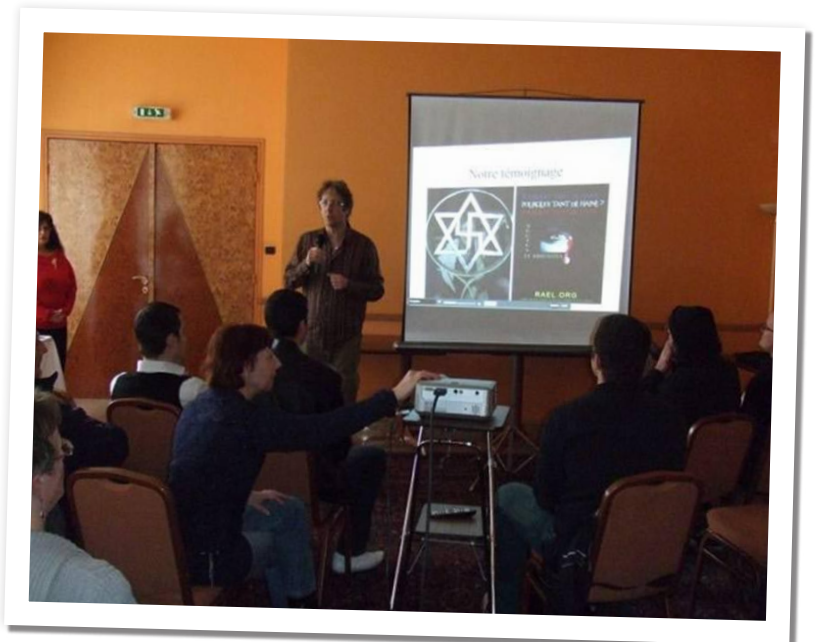

Pierre Andre, assistant guide in Switzerland, in charge of Finland

FRANCE, WHY SO MUCH HATRED?

In France, and especially in the Eastern part, the Raelian Movement is always very present among people and representatives. In the past few months, three lectures were organized in Bourgogne, Lorraine and Alsace. The theme was: Why so much hatred?

It is easy to understand the choice of the title, as we witness so much adversity against new religious minorities in France.

In any case, about forty people came, young stu-

dents and probably the RG (branch of the French police force dealing with political security)... The ambiance was overall very good!

This action was to highlight the ACCOYER bill and to allow our representatives to think over this bill with a more open attitude towards differences. We also requested that the municipality of Montigny- les- Metz compensates us by giving us a free room, because our posters had been mysteriously removed from the town's public advertising display boards.. Of course, we received no answer!

Letters were sent to the President of the Republic, senators and the deputy of Moselle ... once again, a lot of hogwash on their part with no real acknowledgment!

For my part, I talked with Mr. Masson – a Representative- during a diffusion in Metz and he confided to me that indeed the state has no tangible grief against religious minorities. According to him, the fight against sects was a round about way of getting new voters.

Kimbangu Mundele, Guide and spokesperson in France

SIXTY FIRST CANNES FESTIVAL (EUROPE)

The 61st Cannes Festival (France) took place from May 15th to the 21st. A great European diffusion was masterfully organized and coordinated by Issaey. About 40 Raelians invaded the street of Cannes to talk about the messages and our values, and also to look for producers... It didn't take long for our little team to attract the attention of journalists and a few celebrities...

Here are Nathalie's words;

We are living on a wonderful planet... the Raelian planet! Waking up every morning with the Elohim's eyes in your head, and going to bed at night with the beautiful emotions that such an intense and fulfilling life gives you. This is what I have chosen to live daily and for many years to come to sail on the wave of enthusiasm and self-sacrifice, to give unconditionally to this extraordinary philosophy that I chose more than 20 years ago.

Time flies, 20 years of diffusion and actions towards human beings in search of love... and I go through time, I have the constant feeling that I leave indelible marks in people's mind, while contemplating with detachment this life so full of memories rich in teachings...what a great pleasure I feel!

Thank you my Beloved Prophet, thank you Elohim.. I still recognize you as the Creators and I always devote myself to you. This is the choice I make every morning, this is the conscious choice I make in all my actions, on the way leading to the Embassy, that is the choice I made a few days ago joining a team as enthusiastic as me at the Cannes Festival, and sharing with them so much joie de vivre and pride to be a Raelian in front of the sarcasm of society.

I want to say: "YES, we are all wonderful.. We have the courage to declare ourselves, to live for the present what others might never get to live... YES, we will always be there, at least, I will for sure".

And this diffusion in Cannes was as warm in our minds as it was in people's feedbacks. It showed me how much we still have our place in street diffusion, how much people appreciate our contact and happiness...Who are the sarcastic people, the negative ones? I can assure you, they only form a small minority of individuals who don't have the courage to say out loud what they think inside.

Here is the world we live in. On one hand the Raelians, free, whose lives are an ode to happiness no matter the weather... and on the other hand, a handful of dust living in this universe, thirsting for freedom, but lacking respect for ours. It doesn't

matter, what is important is to be there when we choose to be, to be honest in our philosophical thoughts, words and actions, and to become, who knows, examples for this sleeping humanity.

With all my love

Nathalie

Disciple of beauty to serve you

SERBIA

Hello, hello... :-) It's us again :-)

At the end of March we held a conference in Serbia (Novi Sad). As we (Patrizio, Giovanni and me) arrived in Novi Sad on Friday, after 8 hours by car, we immediately started diffusion, handing out flyers in the street inviting people to the conference. My mother joined us in Novi Sad to help. After 5 hours of active diffusion on the road we went home to rest, so tired and so happy... On Saturday evening, after resting and eating well (thank you mama :-), we went to the conference.

People started to come and there were 20 people in the end. Two journalists came as well. And we sold 2 books at the conference! One boy and one girl want to come to the next seminar! So I'm satisfied how things are going in Serbia.

I would like to specially thank Patrizio who drove the car for 8 hours and then he made diffusion with us for the next 5 hours, thank you my brother, you're full of energy and enthusiasm!

Thank you Gerard for your confidence.

Thank you my lovely Prophet for this wonderful opportunity that you give me to express my infinite love for our creators, our fathers, the Elohim...

With all my love,

Sanela Porcasi (National Responsible for Serbia who lives in Italy ... hence the long drive to go there;-)

POEM FROM PATRICK VETILLARD

To close one's eyes and to change the world with a simple glance

To kneel and pray and to make arms and tears disappear with a simple movement

To speak no word and to heal all the wounds of the world with a simple thought

To let inner silence set in and to appease all the suffering with a simple word

To feel linked to infinity through all of one's senses and to feel the role one is meant to play here on Earth letting one's genetic code resonate

To send a thought of love to one's Creators and to feel an unshakable energy fill one's whole being

To open one's eyes to let them sparkle and to believe in one's dreams for the rest of one's life.

To get up and strive so each of one's dreams becomes reality

To light up one's face so each offered smile becomes a ray of hope to those seeking the light

To transmit the Messages of Elohim, hoping that one day human beings will be wise enough to welcome Our fathers

To take Gandhi, Martin Luther King, Jesus or Raël as models and to give one's life so that when death is near one may realize that what was accomplished was bigger than oneself

To be Love in each of one's thoughts, words, actions so that the need to be replaces the need to have or to know

These are my dreams, this is my life, my will and my reason for living..
